### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the claims are allowable over the closest prior art to Simion et al. (US 6185081), Pinarbasi et al. (US 2003/0058586) and Wu et al. (US 2006/0051623). Simion teaches the use of a MgO layer in between Cr layers in a seedlayer portion of a magnetic sensor structure. The reference fails to teach or suggest a motivation to substitute an oxide of Al, Si, Ta, or Hf for the MgO layer taught therein. Pinarbasi et al. fail to teach or suggest the use of Cr layers on both sides of a TaO layer. The reference only suggests the use of a single Cr layer on one side of the TaO layer taught therein. Wu et al. fails to teach or suggest the use of one of the claimed oxide materials in between Cr-based underlayers

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
